

CROWDFUNDING Campaign

for this sustainable ethical project with agri-food chain to develop local economies and the aim of improving the quality of life of families, to limit illegal migration and human trafficking by creating employment for women and young people in LESOTHO-AFRICA

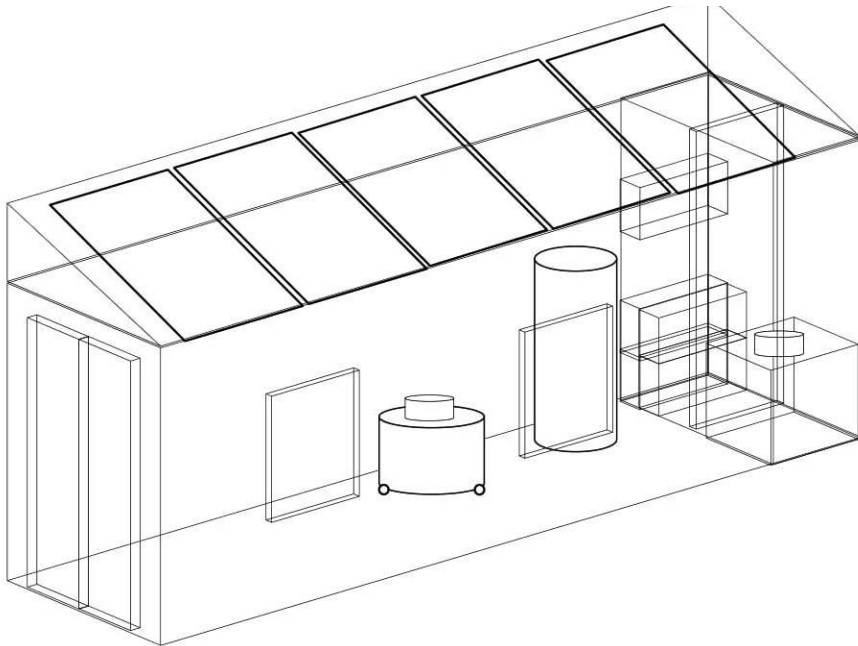

the Mobile self-energy sufficient Dairy

Integrated solution for goat farming with a mobile dairy for milk processing and cheeses production, with energy supply through thermal photovoltaic solar energy systems. independent from the absence of drinking water and power lines .

www.tsaronasocialdevelopment.org

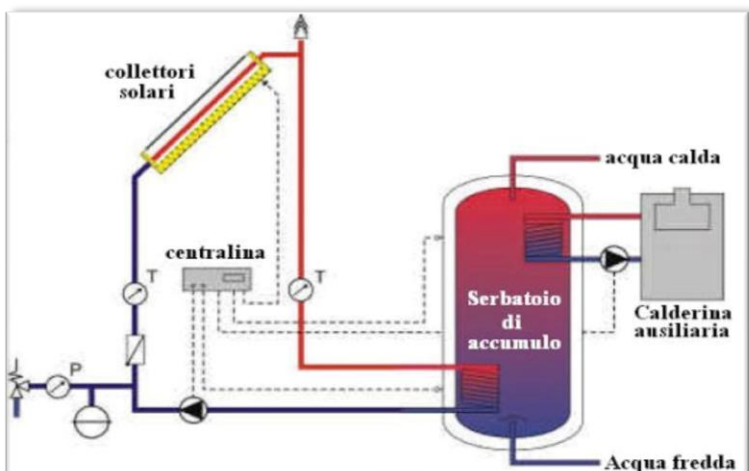

The mobile dairy is made up of: refrigerated tank for milk storage, multifunction for pasteurization and heating of milk, stainless steel processing benches, refrigeration chamber for cheese storage.

Photovoltaic system complete with panels, batteries, inverters and solar thermal system for the production of hot water for the production and washing of dairy products.

Our treatment system for well or river water to make it drinkable with osmosis technology.

It is able to produce 216 liters daily of drinking water with mineral salts

A resistant and solid structure that is easy to install for sheltering goats and for milking them.

Wooden house 374x272 m - 10.17 m² x m as a mobile shop for the sale of cheeses complete with independent fridge with photovoltaic kit
